

## Old Machine Shop

## New Machine Shop

### Did You Know That...

- One of the biggest problems that machining manufacturers face is the lack of new skilled workers to operate their plant.
- The stereotype machining industry has changed to a cleaner environment, better working conditions, and competitive wages.
- ECC has formed an alliance with the machining/manufacturing companies in the surrounding areas to prepare individuals for employment in this industry.
- The student may now enroll in our newly created 15-week machining training program for entry-level positions, and apply the 13-credit hours earned toward their associates degree in Industrial Technology.
- Students are educated and trained on high-tech, state-of-the-art machinery.

### Why Consider A Job In Machining?
