16 HR. TRAIN THE TRAINER

CLASSES ARE NOW BEING
SCHEDULED THRU
SEPTEMBER 2009

“This is great news for Western New York. Receiving the proper health and safety training is crucial for maintaining the sort of job-site safety that will prevent unnecessary accidents”

-U.S. Senator Charles E. Schumer

The curriculum for the Residential Construction Safety Training Program has been developed to address common safety hazards and the applicable standards that pertain to the residential construction industry. This curriculum is designed to provide awareness of the major hazard areas based on local injury statistics along with the recommendations of professionals in their specific fields. Upon completion, each participant will be provided, free of charge, a copy of the OSHA Regulations for the Home Building Industry, a student manual, and a certificate of completion.

TOPICS BEING COVERED INCLUDE:

- SAFETY STANDARDS
- FALL PROTECTION & EQUIPMENT
- PROPER ANCHORING
- LADDER AND SCAFFOLD SAFETY
- HAZCOM
- CONSTRUCTION VEHICLE SAFETY
- TRAILER SAFETY USAGE
- ELECTRICAL SAFETY
- LOCKOUT TAGOUT
- BACK INJURY PREVENTION
- HAND AND POWER TOOL SAFETY
- FIRE SAFETY AND HOUSEKEEPING
- PPE ASSESSMENT AND SELECTION
- EXCAVATION AND HEAVY EQUIPMENT
- HAZARD IDENTIFICATION
- CHEMICAL SAFETY AND STORAGE
- ACCIDENT INVESTIGATION
- SAFETY MANAGEMENT

In Cooperation With:

**ECC and the Buffalo Niagara
Builders Association**
