To whom it may concern:

The purpose of this letter is to provide support for the proposed Legal Medical Professional Consultant certification program at Erie County Community College.

I have been in the recruiting industry for over five years in the Buffalo/Western New York area and have worked with many law firms who specialize in medical malpractice. Through my conversations with these local attorneys, I believe this program would address a growing need in the region for skilled medical professionals who also have a working knowledge of law office practices, legal terminology, and can contribute in a legal/medical position.

I feel that there is a growing need in the Buffalo/Western New York job market for individuals with the dual-threat knowledge and experience this certification program would provide.

Thank you,

Chris Zanghi
