Survey of the Graduates 2025

Each year, the Career Services department of SUNY Erie Community College produces a college-wide statistical analysis of its graduates to provide employment and transfer related outcomes. The results allow potential students the opportunity to see where SUNY Erie graduates go directly after graduation. It is also a valuable assessment tool for SUNY Erie faculty, administrators, school counselors, and the college's Board of Trustees. The Survey of Graduates serves as one method of measuring how effective SUNY Erie is in fulfilling its overall mission.

The Career Services office initiated its contact of certified graduates approximately six months after graduation, based upon records provided by the college Registrar for the 2025 academic year. The department followed the best practices and standards of the National Association of Colleges and Employers (NACE). All graduates were contacted with survey questions via email and/or phone. A comprehensive report from the National Student Clearinghouse was also utilized to gain valuable transfer data.

In place of the term “response rate” we use the term “knowledge rate” to recognize that data came from various sources. Of the 1,402 degrees and certificates awarded in 2025, we had a knowledge rate of 78.1% for Associate Degree graduates and 80.5% for Certificate program graduates. A college-wide summary of both degree and certificate programs is provided at the end of this report.

For an overview of the survey results, please refer to the “SUNY Erie Class of 2025 Career and Transfer Outcomes” infographic at the beginning of the book or continue reading for a program-by-program breakdown of the data. If you have any questions about the report, please contact the SUNY Erie Career Services department.

Sincerely,

Nathan Wallace, *Director of Career Services*
