Patient Transfer

Course Objectives:

This training session will seek to address the proper techniques to be used during a patient transfer or re-position. The training will include presentations of the proper techniques and precautions that can be used to reduce the threat of sprains, strains and other injuries occurring during the transfer of patients. Other program activities will include how to identify high risk transfers and the patients’ ability to assist and maintain weight bearing status during a transfer.

Course Content:

The following provides an overview of the main topics covered in this course*:

- Proper techniques
- Reducing sprains, strains, and other injuries
- Identify high risk transfers and the patients’ ability to assist

*All training is customized to meet the needs of associates at every level of the organization.

Additional Information:
